Suggested Keywords List

Ablation-catheter
Accessory pathways
Accessory pathways, ablation
ACE inhibitor
Acetylcholine
Acquired immunodeficiency syndrome
Adenosine
Aging
Atherosclerotic obliterans
Alcohol
Aldosterone
Alpha-adrenergic receptor agonists
Alpha-adrenergic receptor blockers
Ambulatory ECG
Ambulatory blood pressure
Amiodarone
Aneurysms
Angina pectoris
Angiocardiography
Angiogenesis
Angiography
Angioplasty
Angioscopy
Angiotensin II
Antiarrhythmia agents
Antibodies
Anticoagulants—see Thrombin and Platelet inhibitors
Anti-dyslipidemic agents
Antihypertensive therapy
Antioxidants
Aorta
Aortic coarctation
Aortic diseases
Aortic regurgitation
Aortic valve
Aortic valve stenosis
Aortocoronary bypass
Apolipoproteins
Apoptosis
Arrhythmias
Arrhythmias, treatment of
Arteries
Arteriosclerosis
Artificial intelligence
Aspirin
Assisted circulation
Asymptomatic myocardial ischemia
Atherectomy
Atherosclerosis
Atrial fibrillation
Atrial flutter
Atrial function
Atrial natriuretic peptide (factor) — see Natriuretic peptides, atrial
Atrioventricular node
Autonomic agents
Autonomic nervous system

Baroreceptors
Beta-adrenergic receptor agonists
Beta-adrenergic receptor blockers

Biology, developmental
Blood cells
Blood coagulation
Blood flow
Blood pressure
Blood pressure determination
Blood vessel prosthesis
Body surface mapping
Bradycardia
Bradykinin
Brain

Calcium
Calcium channel blocking drugs
Cardiac arrest
Cardiac mapping
Cardiac output
Cardiac pacing, artificial
Cardiac surgery
Cardiac tamponade
Cardiology, practice/management
Cardiomyopathies, dilated
Cardiomyopathies, hypertrophic
Cardiomyopathies, other
Cardiomyoplasty
Cardiopulmonary resuscitation
Cardiovascular development
Cardiovascular disease
Cardiovascular disease, prevention
Carotid arteries
Catecholamines
Cell physiology
Cell therapy
Cells
Central nervous system
Cerebrovascular circulation
Cholesterol
Cholesterol-lowering drugs
Cholesterol screening
Circadian rhythm
Clinical laboratory information systems
Clinical trials
Cocaine
Collagen
Collateral circulation
Complications
Computed tomography
Computer-assisted instruction
Computer communication networks
Congenital heart disease — see Heart defects, congenital
Contractile proteins
Contractility
Contrast echocardiography
Contrast media
Coronary artery disease
Coronary circulation
Coronary heart disease
Coronary microcirculation
Coronary vasospasm
Coronary vessels

Cost-effectiveness
 Creatine kinase
 Cytokines

 Death, sudden
 Decision making, computer-assisted
 Defibrillation, atrial
 Defibrillation, ventricular
 Defibrillators, implantable
 Diabetes mellitus
 Diagnosis, computer-assist-ed
 Diagnostic techniques
 Diastole
 Diastolic dysfunction
 Diet
 Digitalis-glycosides
 Diuretics
 Dopamine
 Doppler ultrasound
 Dose-response relationship, drug
 Drug administration
 Drug interactions
 Drug therapy

 Echocardiography,transesophageal
 Echocardiography,transthoracic
 Ejection fraction
 Elderly
 Electric countershock
 Electrocardiography
 Electron beam CT
 Electropharmacology
 Electrophysiology
 Emergency care
 Endocarditis
 Endothelin
 Endothelium
 Endothelium-derived relaxing factor
 Energy metabolism
 Enzyme inhibitors
 Enzymes
 Epidemiologic methods
 Epinephrine
 Estrogen
 Exercise
 Exercise tests
 Experimental medicine
 Extracellular matrix
 Extracorporeal circulation

 Fatty acids
 Fetal cardiology
 Fibrinolytic agents
 Financial incentives
 Fish oils
 Follow-up studies
 Free radicals/scavengers

 G proteins
 Gap junctions
 Gene-based therapy
 Gene expression
 Genetic techniques
 Genetics
 Glucose
 Growth factors

 Health education
 Health services
 Heart, artificial
 Heart block
 Heart catheterization
 Heart conduction system
 Heart defects, congenital
 Heart defects, echocardi-ography
 Heart defects, interventional
 Heart disease
 Heart failure
 Heart failure, treatment
 Heart function tests
 Heart rate
 Heart septal defects
 Heart surgery

 Heart valve prosthesis
 Heart valves
 Hemodynamics
 Hemostasis
 Histamine
 Hormones
 Hyperlipoproteinemia
 Hypertension
 Hypertension, pulmonary
 Hypertension, renal
 Hypertrophy
 Hypoxia

 Image processing, computer-assisted
 Immune suppression
 Immune system
 Immunologic factors
 Immunologic techniques
 Implants, artificial
 Indicator dilution techniques
 Infarct size
 Infectious disease
 Inotropic agents
 Insulin
 Integrated delivery systems
 Interventional cardiology
 Intravascular ultrasound/Doppler
 Investigational drugs
 Ion channels
 Ion currents
 Ion transport
 Ischemia
 Ischemia, preconditioning
 Ischemia, reperfusion

 Kawasaki disease
 Kidney

 Laser
 Leukocytes
 Leukotrienes
 Lipoproteins
 Lipoproteins, HDL
 Lipoproteins, LDL
 Longitudinal studies

 Macrophages
 Magnesium
 Magnetic resonance imaging
 Magnetic resonance spec-troscopy
 Medical record systems, computerized
 Membrane potentials
 Metabolism
 Microcirculation
 Mitral regurgitation
 Mitral valve, repair, replacement
 Mitral valve prolapse
 Mitral valve stenosis
 Molecular biology
 Monitoring, physiologic
 Monoclonal antibodies
 Morphogenesis
 Muscarinic agonists/blockers
 Muscle, cardiac — see Myocardium
 Muscle, skeletal
 Muscle, smooth
 Myocardial contraction
 Myocardial hibernation
 Myocardial infarction, pathophysiology
 Myocardial infarction, treatment
 Myocardial stunning
 Myocarditis
 Myocardium
 Myoglobin
 Myosin

 Natriuretic peptides, atrial
 Natriuretic peptides, brain
 Neoplasms
 Nitrates/Nitroglycerin
 Nitric oxide
 Non-pharmacological therapy
 Norepinephrine
 Nutrition

Obesity	Septal defects
Oncogenes	Serotonin
Outcomes assessment	Shock
Oxygen consumption	Signal averaging
	Signal transduction
Pacemaker, artificial	Sinoatrial node
Pacing	Smoking
Parasympathetic nerve	Sodium
Pathology	Sotalol
Patient care	Species difference
Pediatric cardiac surgery	Spectrum analysis
Pediatric cardiology	ST segments
Peptides	Stent
Pericarditis	Stress
Pericardium	Stress echocardiography
Peripheral vasculature	Stroke
Pharmacokinetics	Stroke volume
Pharmacology	Sudden death
Phonocardiography	Superoxide dismutase
Phosphodiesterase inhibi-tors	Supraventricular tachycardia
Physiology	Sympathetic nerve
Plaque	Syncope
Plasminogen activators	Systole
Platelets	Systolic dysfunction
Platelet inhibitors	
Potassium	Tachycardia
Preexcitation	Tech assessment
Pregnancy	Tei index
Pressure-volume relation	Tetralogy of Fallot
Prevention	Thermal therapy
Prognosis	Thrombin inhibitors
Prostacyclin	Thromboembolism
Prostaglandins	Thrombolysis
Prosthetic valves	Thrombosis
Pulmonary artery	Thromboxanes
Pulmonary circulation	Thyroid hormones
Pulmonary edema	Tilt-testing, head up
Pulmonary embolism	Tomography
Pulmonary function	Transfect
Pulmonary heart disease	Transplantation
Pulmonary hypertension	Tricuspid regurgitation
Pulmonary valve	Tricuspid valve
Purkinje fibers	Troponin
Quality improvement	Ultrasonic diagnosis
Quality of life	Ultrasound
QT interval	Unstable angina
QT syndrome-inherited	
	Valvular disease
Radioisotopes	Valvuloplasty
Radionuclide imaging	Vascular biology
Receptors, beta-adrenergic	Vascular surgery
Receptors, endogenous substances	Vasoconstriction
Reentry	Vasodilation
Reflexes, cardiovascular	Vasodilator agents
Rehabilitation	Vasopressin
Renal circulation	Ventilation
Renal function	Ventricular action potential
Renin	Ventricular arrhythmia
Reperfusion	Ventricular fibrillation
Repolarization	Ventricular function
Restenosis	Ventricular remodeling
Revascularization	Ventricular rupture
Rheumatic heart disease	Ventricular tachycardia
Rhythm disorders	Viruses
Risk factors	
Risk factors, gender-related	Waon therapy
	Wolff-Parkinson-White syndrome
